Medical Considerations for Cruising at Sea 3 Days or More

Dr. Agu Suvari

Wickford Yacht Club invites members and guests to an educational program featuring Dr. Agu Suvari who will share his advice on medical considerations when cruising for 3 days or more. He will also review what needs to be in your onboard first aid kit. He will review the essential items and explain how the layperson can operate the Club's automated external defibrillator (AED). You won't want to miss this practical information session that will fill in knowledge gaps for even the most experienced captain and crew.

The program will begin at 7:30 pm following a meet-and-greet social period starting at 7pm. The program will be held at WYC. There is no charge to attend, and the seminar is open to the public.
